

StarBoard PXDUO PLASMA OVERLAY

Turn your plasma display into an engaging multi-touch, interactive experience with the StarBoard PXDUO.

An Interactive Transformation

The StarBoard PXDUO fits perfectly over your 50" or 65" Panasonic plasma display and transforms it into an interactive multi-touch screen with full mouse functionality. It gives users the ability to control computer applications, navigate websites, and write notes on the display with their finger, stylus, or any object.

Ideal for Presentations

Control the pace and flow of your presentation using the shortcut buttons on the overlay, giving you maximum screen space to show your work. Mark up web sites, documents, and multi-media files with digital inks. Then, save your notes and recall them later.

HITACHI
Inspire the Next

I'm excited about the breadth of possibilities on how we can develop our training to be more engaging and interactive.

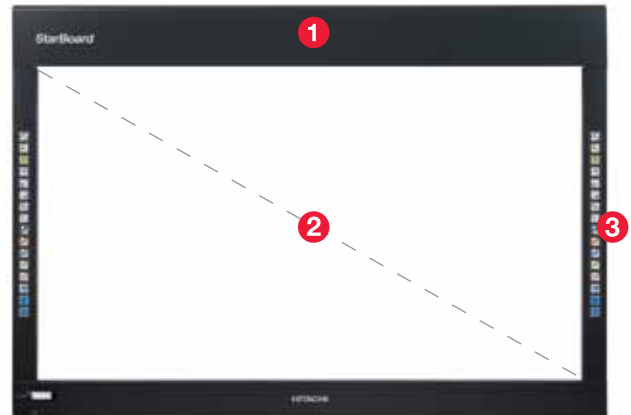

– Sylvia Smith, Kaiser Permanente Training Manager

StarBoardPXDUO
